 Verbose Output
 Clean up Markup with HTML Tidy

[Help](#) on the options is available.

[Revalidate](#)

Congratulations

The document located at <http://jhardy.aiwsites.com/imd110/index.htm> was successfully checked as XHTML 1.0 Strict. This means that the resource in question identified itself as "XHTML 1.0 Strict" and that we successfully performed a formal validation using an SGML, HTML5 and/or XML Parser(s) (depending on the markup language used).

"valid" Icon(s) on your Web page

To show your readers that you have taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the HTML you could use to add this icon to your Web page:

```
<p>
<a href="http://validator.w3.org/check?uri=referer"></a>
</p>
```

```
<p>
<a href="http://validator.w3.org/check?uri=referer"></a>
</p>
```

A [full list](#) of icons, with links to alternate formats and colors, is available: If you like, you can download a copy of the icons to keep in your local web directory, and change the HTML fragment above to reference your local image rather than the one on this server.

Linking to this result

If you would like to create a link to *this* page (i.e., this validation result) to make it easier to revalidate this page in the future or to allow others to validate your page, the URI is <http://validator.w3.org/check?uri=http%3A%2F%2Fjhardy.aiwsites.com%2Fimd110%2Findex.htm;accept=text%2Fhtml%2Capplication%2Fhtml%2Bxml%2Capplication%2Fxml%3Bq%3D0.9%2C%2F%3Bq%3D0.8;accept-language=en-us%2Cen%3Bq%3D0.5;accept-charset=ISO-8859-1%2Cutf-8%3Bq%3D0.7%2C%3Bq%3D0.7> (or you can just add the current page to your bookmarks or hotlist).

Validating CSS Style Sheets

If you use [CSS](#) in your document, you can [check it](#) using the W3C [CSS Validation Service](#).

- Validate error pages
- Verbose Output
- Clean up Markup with HTML Tidy

[Help](#) on the options is available.

[Revalidate](#)

Notes and Potential Issues

The following notes and warnings highlight missing or conflicting information which caused the validator to perform some guesswork prior to validation. If the guess or fallback is incorrect, it could make validation results entirely incoherent. It is *highly recommended* to check these potential issues, and, if necessary, fix them and re-validate the document.

Byte-Order Mark found in UTF-8 File.

The Unicode Byte-Order Mark (BOM) in UTF-8 encoded files is known to cause problems for some text editors and older browsers. You may want to consider avoiding its use until it is better supported.

Congratulations

The document located at <http://jhardy.aiwsites.com/imd110/paint.htm> was successfully checked as XHTML 1.0 Strict. This means that the resource in question identified itself as "XHTML 1.0 Strict" and that we successfully performed a formal validation using an SGML, HTML5 and/or XML Parser(s) (depending on the markup language used).

"valid" Icon(s) on your Web page
