**Options**

Show Source     
  Show Outline     
  List Messages Sequentially   
  Group Error Messages by Type

Validate error pages     
  Verbose Output     
  Clean up Markup with HTML-Tidy

[Help](#) on the options is available.

## Notes and Potential Issues

The following notes and warnings highlight missing or conflicting information which caused the validator to perform some guesswork prior to validation, or other things

affecting the output below. If the guess or fallback is incorrect, it could make validation results entirely incoherent. It is *highly recommended* to check these potential issues, and, if necessary, fix them and re-validate the document.

 **Using experimental feature: *HTML5 Conformance Checker*.**

The validator checked your document with an experimental feature: *HTML5 Conformance Checker*. This feature has been made available for your convenience, but be aware that it may be unreliable, or not perfectly up to date with the latest development of some cutting-edge technologies. If you find any issues with this feature, please [report them](#). Thank you.

## Congratulations

---

The uploaded document "index.html" was successfully checked as HTML5. This means that the resource in question identified itself as "HTML5" and that we successfully performed a formal validation of it. The parser implementations we used for this check are based on [validator.nu](#) (HTML5).

### Validating CSS Style Sheets

If you use [CSS](#) in your document, you can check it using the W3C [CSS Validation Service](#).
